

GHCHA, as a Delegated Credentialing Entity shall abide by the **FDR Compliance Program required by CMS for Medicare and applicable state government plans. (Note: some Payers now require this for their Commercial Products, which is why we require attestation from all providers regardless of product participation.)**

The FDR Compliance Program Requirements are an extension of the GHCHA Credentialing Policies and Procedures regarding performing any Medicare Advantage (MA) and/or applicable Medicaid-related delegated services or functions for a Health Plan, Payor, or Network (“Delegator”). These requirements apply to GHCHA and its health care providers that opt in to participate in Medicare and/or applicable Texas Medicaid programs and applicable commercial plans such as UHC.

As such, GHCHA and its health care provider(s) must maintain effective training and educational materials on general compliance and on combating fraud, waste, and abuse (FWA) that are consistent with the Centers for Medicare & Medicaid Services (CMS) requirements. **Annually GHCHA requires their providers to attest to these requirements. FDR Attestations are sent out via email to each provider/practice annually in the fall.**

GHCHA has adopted HICE training tools for FWA, HIPAA and Compliance. It makes the following resources available to review and/or use to **train providers within 90 days of hire/contracting and annually thereafter.**

This tab includes the following resources:

- GHCHA FWA Training Tool

- GHCHA HIPAA Training Tool

- GHCHA Compliance Training Tool

- GHCHA Code of Conduct

- Current GHCHA FDR Attestation Form

The GHCHA **Business Continuity Plan (BCP) if applicable** and **Security Incident and Breach Notification Policy** are available upon request.
